REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1 and 14 are patentable over the prior art patents and printed publications because of the specific method for ablation of a surface on a rotating drum using a number of laser fibers, an AOM array and an optical system for forming a multi-spot array moveable together in the direction of the axis of rotation of the drum, wherein the AOM array divides up each of the laser beams emerging from the laser fiber exits into at least two partial beams converging in a fan shape in a vicinity of the entry pupil of the optical system, wherein the points of incidence of all of the partial beams lie beside one another in a line on the surface, partly overlapping adjacent points of incidence and covering at least two planes, and wherein the points of incidence on the surface in each plane are respectively lying on an axis forming an angle with the rotational axis of the drum. The combined limitations are not taught by the art of record alone or in combination.

Claim 21 is patentable over the prior art patents and printed publications because of the claimed multibeam scanning device for ablation of the surface on the drum further includes the AOM array with a number corresponding to the number of the laser fibers and having converters whose alignment corresponds to the alignment of the convergence of the laser beams. The combined limitations are not taught by the art of record alone or in combination.

Claims 2-8, 11-13, 16, 19-20 and 22-24 are allowed because they are directly or indirectly dependent from claims 1 and 14 above.

Art Unit: 2861

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
